【 About the type of password 】

- Password: (In My page, the initial PWD)

This will be needed if you have to log-in to MT4.

If you log-in with this password, all the functions such as ordering will be ready for use.

- Password (Read only): (In My page, the initial PWR(r))

If you are going to log-in with this password, you will not be able to place an order, you will only be logged-in to the viewable condition. Although there has not been a case that this is being used normally, please use this if you want to disclose an account to a third party.

Once you have confirmed that there is no mistake in the input information, then lastly, click the "OK" button.

- Additional note after log-in

When the desired currency pair was not displayed, if it is a currency pair that is being handled by our company, please right click the top of the quote display window, just like the image above, it will be displayed in the [**display all the currency pair**] .
